Marvin Leonel Rivas Trejo

San Marcos, San Salvador • mrivas@cikume.com • +503 7921 0328

Education

Universidad Don Bosco   **Soyapango**, **San Salvador**
Computer Science Engineer   Dec 2018
Relevant Coursework: Computer Architecture, .Net Develop, SQL Databases

Instituto Tecnico Ricaldone   San Salvador, San Salvador
Second place overall in the area of systems development   Dec 2012

Experience

Cikume Software   San Salvador, San Salvador
.NET Engineer   Jan 2025 – Current

- Collaboration in the development of solutions in C# and .NET 8 for the LCP Tracker system.

Clearview El Salvador   Remote
Integration Developer   March 2023 – Jan 2025

- Develop integrations between client APIs and our systems by developing internal APIs with C# in .NET.
- Implement new features to existing integrations, as well as improve current code using Dictionaries, Hash Sets, or LINQ methods.
- Evaluate teammates' solutions in Pull Requests made on the JIRA platform.
- Read SQL Server and MongoDB databases, as well as occasionally develop stored procedures.
- Coordinate cooperative tasks for new integrations.

Tech Affinity   Remote
Software Developer   May 2022 – March 2025

- I refactored C# code to improve system response times, as well as develop utilities for new clients.
- I optimized an Angular interface for insurance acquisition systems and packages of different categories.
- I built tools for automating data loading processes to the system's databases using C#.

Defensoría del Consumidor   Antiguo Cuscatlan, La Libertad
Developer Coordinator   Aug 2021 – May
2022

- I coordinated and delivered pioneering solutions for a four-person development team.
- I implemented Azure Dev Ops cloud solutions for managing the tasks of each team member, specifically Azure Boards and Azure Repos.
- I supervised the progress of systems contracted with external companies.
- I implemented the SCRUM methodology to speed up development times and performance of the development team

Banco Central de Reserva   San Salvador, San Salvador
Software Developer   Jan 2021 – Aug 2022

- I collaborated in the migration of the import and export system, to move from a monolithic architecture to a microservices one using Java and Spring Boot.
- I optimized SQL queries to Oracle databases.
- I updated the interfaces of the pages for the Import and Export Query System using Bootstrap.

Sykes El Salvador   San Salvador, San Salvador
Full Stack Developer   Nov 2018 – Jan 2022

- I collaborated in the migration of the import and export system, to move from a monolithic architecture to a microservices one using Java and Spring Boot.
- I optimized SQL queries to Oracle databases.
- I updated the interfaces of the pages for the Import and Export Query System using Bootstrap.

Leadership & Activities

Defensoría del Consumidor   **Antiguo Cuscatlan, La Libertad**
Developer Coordinator   Aug 2021 – May 2022

- I played the role of project leader in different developments.
- I played the role of scrum master for internal projects.
- I played the role of project advisor for external developments.

Sykes El Salvador   **San Salvador, San Salvador**
Full Stack Developer   **Nov 2018 – Jan 2022**

- I served as development leader for a Software Developer Unit, specializing in clients with multiple locations.
- I worked as part of the semi-autonomous systems development team, applying Selenium for process automation.

Skills & Interests [Note: Optional]

Technical: C#, .NET 8, Node JS, TypeScript, Azure DevOps, SQL Server, MySQL, PostgreSQL, MongoDB
Language: English
Interests: Learn new technologies for software developers, watch movies or anime series, travel with my family and play video games and soccer.
